FINE FILTER

GLASSFIBRE MINI PLEAT (FGM)

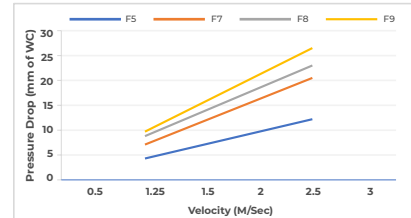

Grade: F6 to F9 OR MERV 11 to MERV 16

ISO 16890/ ASHRAE 52.2-2017/EN 779-2012

These fine dust filters are manufactured from rigid Anodised Aluminium extrusions with (new-gen), high-efficiency mini-pleated microfibre glass fiber media with hotmelt separators. The filters have the edge over the competition regarding their high dust holding capacity. Available in a range of depths from 2" to 6" depending upon the filter face velocity, the filtration grades range from F6 to F9 or MERV 11-16. All four sides of the filter are sealed in polyurethane for enhanced filtering efficiency with a single, double, or no header flange.

Filter Features

- The FGM series are filters made from new generation high efficiency mini-pleated micro fine fibreglass media with hotmelt separators in rigid non-corrosive metal frames.
- Mainly used in air handling units one stage prior to HEPA filters, very economical due to higher final pressure drop.
- The filter media is moisture resistant and fire retardant.
- Filter grades F6 to F9 OR MERV 11 to MERV 16.
- Tested in accordance to EN779-2012 / ISO 16890 / ASHRAE 52.2-2017.
- FGM series available in various sizes & installation options to fit almost any customer requirements.
